

OLUWASEUN OYEMAKINDE

GIS & Hydrographic Data Specialist | Remote Sensing | UAV Operator (A2CofC)

Falkirk, UK | +44 7823 563947 | seunoyemakinde@hotmail.com | linkedin.com/in/oluwaseunoyemakinde

PROFILE

Geospatial data specialist with over six years of professional experience in GIS analysis, hydrographic data processing, and remote sensing, underpinned by more than two decades of military service, including operational deployments with the Nigerian Army and a UN peacekeeping mission in the Central African Republic (MINUSCA). Holds an MSc in Geographic Information Systems from the University of Aberdeen and a CAA A2 Certificate of Competency for UAV operations. Skilled in ArcGIS Pro, QGIS, PostGIS, and Python (ArcPy, Pandas, GeoPandas) for spatial analysis, data pipelines, and workflow automation, with hands-on experience processing multibeam sonar, side-scan sonar, and GNSS positioning data for offshore infrastructure projects. Proven track record designing and delivering GIS and UAV training programmes, producing publication-ready cartographic outputs, and communicating technical findings clearly to both specialist and non-technical stakeholders under time-critical conditions.

CORE SKILLS & TECHNICAL TOOLS

- GIS & Mapping: ArcGIS Pro 3.x, ArcGIS Online & Dashboards, QGIS, ERDAS Imagine, Global Mapper, AutoCAD Map 3D
- Programming & Automation: Python (ArcPy, Pandas, GeoPandas), SQL, ModelBuilder, R,
- Hydrographic & Survey Data: Multibeam echosounder, side-scan sonar, GNSS positioning, data QA/QC, metadata & offset management
- Spatial Data Management: PostGIS, geodatabase design, ETL pipelines, data governance and auditability
- Web Mapping & Dashboards: ArcGIS Dashboards, Streamlit, Folium, Power BI
- UAV & Remote Sensing: UAV ISR mission planning (A2CofC), Pix4D photogrammetry, point cloud processing
- Geospatial Intelligence: Operational cartography, route/terrain/pattern-of-life analysis, situational awareness (GINA)
- Project & Delivery: GIS/UAV training design and delivery, stakeholder briefing, Jira, MS Project, Balsamiq

WORK HISTORY

Hydrographic Data Processor / Geospatial Data Analyst

June 2024 – Present

Acteon Geo-services (UTEC NCS Survey) | Aberdeen, UK

- Process, analyse, and quality-assure large hydrographic and geospatial datasets — including multibeam echosounder, side-scan sonar, and GNSS positioning data — to support offshore infrastructure projects and spatial decision-making.
- Apply professional judgement to assess data quality, limitations, and risk, advising project teams on the appropriate use and interpretation of outputs.
- Maintain comprehensive processing logs, metadata records, and offset documentation to uphold traceability, repeatability, and regulatory compliance.
- Produce professional charts, maps, and spatial deliverables in AutoCAD Map 3D, meeting tight deadlines for offshore infrastructure clients.
- Collaborate across offshore and onshore multidisciplinary teams to resolve QC/QA issues, maintaining HSE standards and clear communication with engineers and survey managers.

Assistant Project Manager (Contract)

Jun – Aug 2023

Net Zero Technology Centre | Aberdeen, UK

- Supported an industry-led R&D collaboration programme on robotics and autonomous systems for remote offshore energy assets, developing an evidence-based business case for senior decision-making.
- Gathered, analysed, and documented project requirements, reviewing objectives for compliance with grant award conditions and translating technical/commercial analysis into recommendations.
- Supported investment packaging for the Offshore Low-Touch Energy Robotics (OLTER) programme, communicating complex technical concepts to non-technical audiences.

GIS Technician / UAV Sensor Operator

Sep 2020 – Aug 2022

United Nations MINUSCA | Central African Republic (Operational Deployment)

- Created and maintained high-quality spatial datasets and patrol route maps for joint task force operations across Bangui, enabling evidence-based operational planning for 500+ personnel.
- Utilised the Geographic Information Assistant (GINA) to track and visualise multi-agency movement data, enhancing situational awareness across a UN peacekeeping theatre.
- Improved three city-wide sensor networks, measurably reducing infiltration of armed elements through better spatial intelligence and monitoring coverage.
- Delivered ISR reports, cartographic products, and spatial analysis outputs to command teams under time-critical conditions.

GIS Technician / UAV Pilot

Jan 2014 – Jun 2020

50 Space Command, Nigerian Army | FCT, Abuja

- Introduced GIS and remote sensing into the national military training curriculum, designing and delivering courses that upskilled 100+ personnel in spatial data collection and analysis.

- Led fixed- and rotary-wing UAV flight operations, performing image acquisition and post-mission imagery analysis for intelligence and mapping purposes.
- Read, interpreted, and produced operational maps; maintained full accountability for specialist GIS and UAV equipment assets.
- Managed a team of four technicians, optimising workflows and ensuring operational readiness across concurrent assignments.

SELECTED GIS PROJECTS

Index of Multiple Deprivation (IMD) Mapping — England

- Built an end-to-end Python (Pandas, GeoPandas) pipeline merging ONS deprivation data with LSOA boundary files, cleaning, joining, and reprojecting geospatial data to WGS84.
- Developed an interactive Streamlit dashboard with a Folium choropleth (decile-level tooltips and popups) and Altair charts to explore IMD decile patterns by Local Authority.
- Applied automated decile and quantile classification in ArcGIS Pro at LSOA level to produce publication-ready cartographic outputs highlighting regional inequality and deprivation patterns.

Conservation & Habitat Mapping System

RCMRD, Sep 2025

- Designed and implemented a geodatabase schema in ArcGIS Pro and ArcGIS Online to manage forestry, wildlife, and land-cover data across a complex multi-layer environment.
- Performed spatial analysis and habitat suitability mapping to guide woodland creation and restocking decisions, providing actionable intelligence to policy and field teams.
- Built ArcGIS Dashboards and interactive web maps to improve data accessibility for non-technical stakeholders.

ADDITIONAL EXPERIENCE

Project Management / Business Analyst (Work Experience)

Jun – Dec 2025

Tritek Consulting Academy (UK)

- Designed and documented a no-code digital platform for donations, volunteer management, and campaign reporting: business case, requirements, user stories, and functional/technical specifications.
- Maintained RAID logs, supported UAT, and contributed to Agile delivery (backlog refinement, sprint planning) in a PRINCE2-aligned environment.

Logistics Assistant

Sep 2009 – Oct 2010

Nigeria Signals (NISIG) 10, United Nations Mission | Liberia

- Coordinated logistics support for signals operations during a UN peacekeeping deployment, managing equipment, supplies, and resource allocation across the mission area.
- Maintained accountability and tracking records for communications and logistics assets in a multinational operational environment.

Administrative Clerk

Aug 1998 – Sep 2013

Headquarters Nigerian Army Signals | Apapa, Lagos

- Managed administrative records, correspondence, and documentation to support signals unit operations and personnel administration.
- Maintained filing systems and processed routine administrative paperwork in accordance with military standards.

EDUCATION

MSc Geographic Information Systems — University of Aberdeen

Jan 2024

Relevant coursework: GIS tools, techniques and geovisualisation; UAV mapping, monitoring and remote sensing; advanced spatial analysis and programming; advanced map algebra; current GIS applications.

BSc Geology — Olabisi Onabanjo University, Ago-Iwoye, Ogun State, Nigeria

May 2008

PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

- CAA A2 Certificate of Competency (A2CofC) — UAV Operations
- Scrum with AI Certified (Jan 2026); Scrum Fundamentals Certified (Nov 2025)
- PRINCE2 Foundation (in progress)
- Data Engineering Zoomcamp, DataTalks.Club (Apr 2026); Geospatial Data Engineering, Coursera
- Application of GIS in Conservation Mapping, RCMRD (Sep 2025); ArcGIS Python Scripting, LinkedIn Learning (Mar 2025)
- Point Cloud Processing & 3D Visualisation with QGIS; AutoCAD Map 3D for GIS Engineers, Udemy (Apr 2024)
- CoRise SQL Crash Course; Pix4D Drone Mapping, LinkedIn Learning

PROFESSIONAL MEMBERSHIPS

- Association for Geographic Information (AGI)
- Association for Project Management (APM)
- Association of Remotely Piloted Aircraft Systems UK (ARPAS-UK)
